

FOSS4G GeoAcademy Curriculum

July 18, 2018

<http://spatialquerylab.com/foss4g-academy-curriculum/>

The screenshot shows a web browser window displaying the FOSS4G GeoAcademy Curriculum page. The browser's address bar shows the URL spatialquerylab.com/foss4g-academy-curriculum/. The page header includes the Spatial {Query} Lab logo and navigation links for HOME PAGE, PROJECTS, NEWS & BLOG, and ABOUT US. The main content area features the title "FOSS4G ACADEMY CURRICULUM" and a sub-section "FOSS4G GEOACADEMY CURRICULUM". The text describes 35 university-level lectures and labs, their focus on vendor-agnostic theories and principles, and their availability under a Creative Commons Attribution 3.0 license. It lists five specific courses: GST 101 (Introduction to Geospatial Technology), GST 102 (Spatial Analysis), GST 103 (Data Acquisition and Management), GST 104 (Cartographic Design), and GST 105 (Introduction to Remote Sensing). An "ATTRIBUTION FOR DEVELOPMENT" section at the bottom credits the Department of Labor (DOL) Trade Adjustment Assistance Community College and Career Training (TAACCCT) and lists several partner institutions.

The FOSS4G GeoAcademy course for GIS is based on QGIS, GRASS and Inkscape. We recommend training for aimags and sums to follow this curriculum for consistency and online support.
