This is web application that helps the province of Töv to manage the mining sites for which they are responsible.

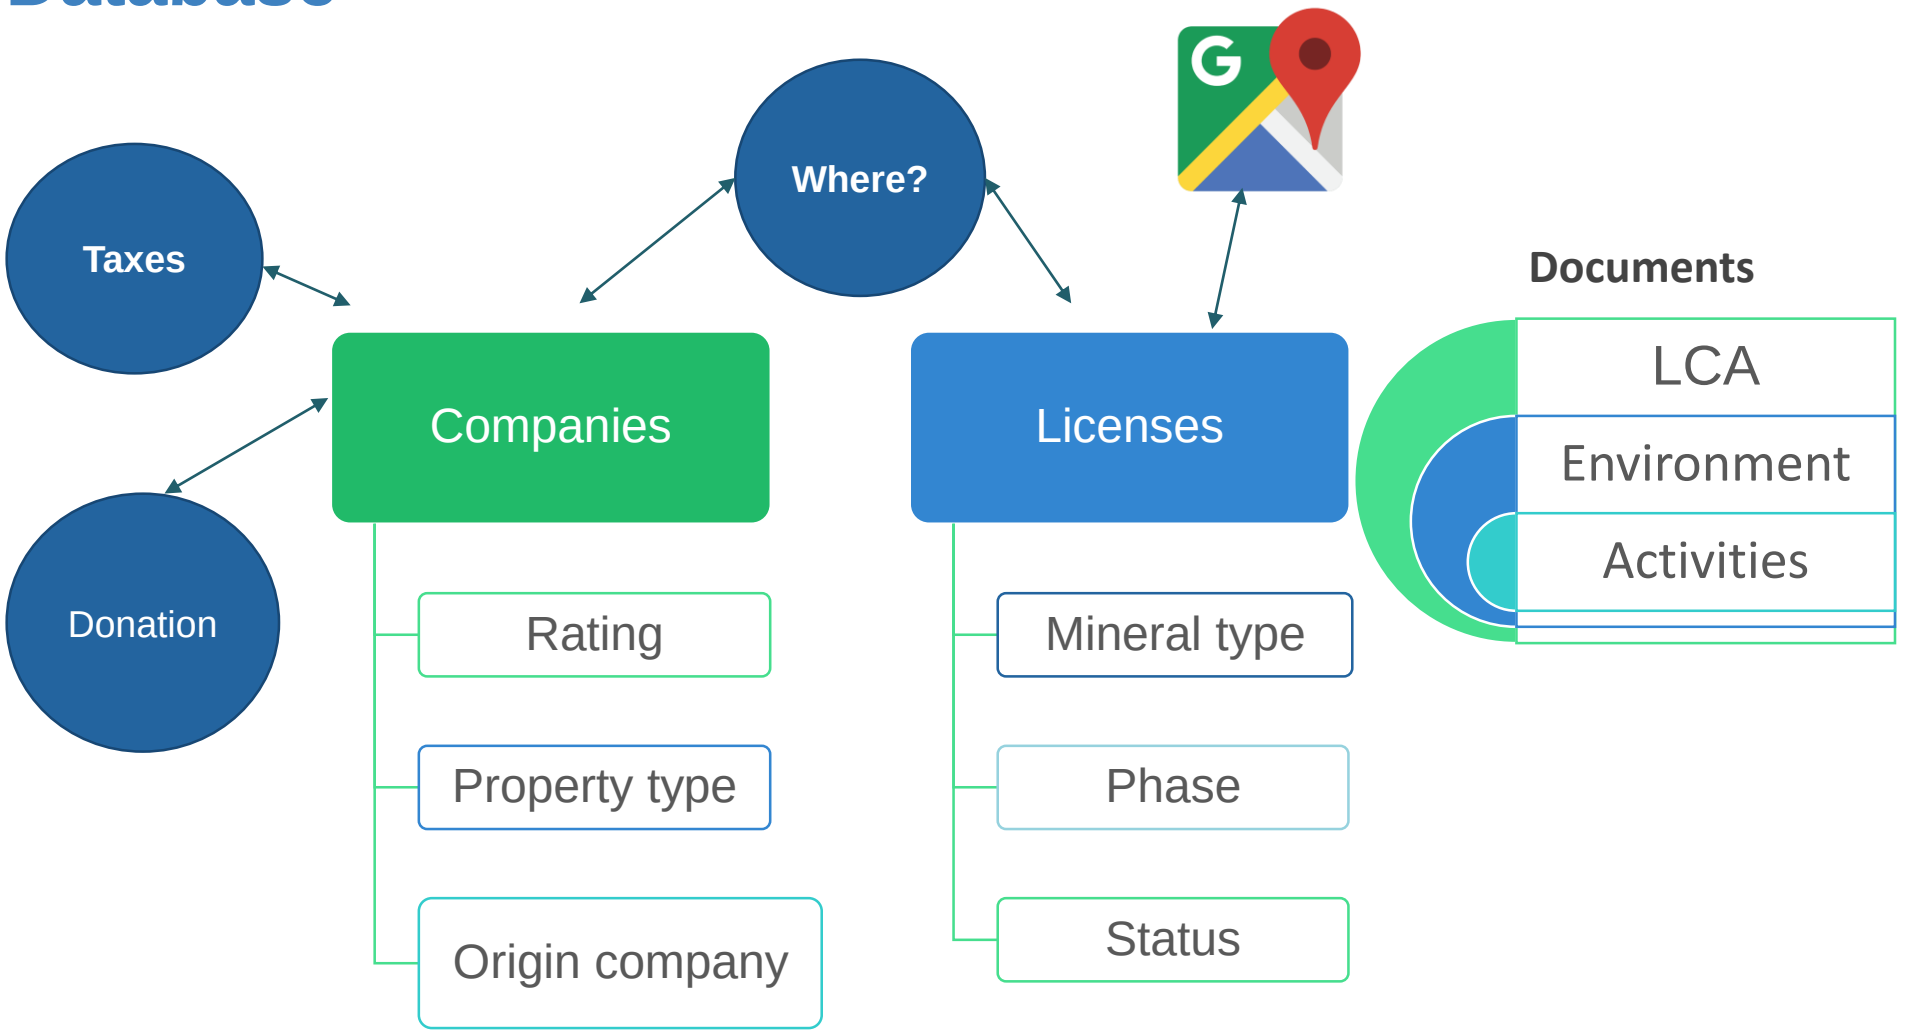

Transparency

- The system standardizes the management process flow of the mining licenses.
- All documents on Local Cooperation Agreement, environment and mining activities at the same place

Mining Database

All the information in one place

Managers can share all the information about licenses, taxes collected and donations received by companies.

Company search is possible on different criteria

Managers can give different rating to a company.

All documents related to the company can be uploaded and downloaded

The departments can follow all companies, licenses, taxation and donation as well as deadlines.

Documents for Local Cooperation Agreement, Mining activities and Environment plans can be attached to the license

Next steps…

- Encode all companies/licenses in the database
- Develop more reports
- Develop a map of the licenses
- Integrate the database to Tuv Website for more transparency
